LIST OF CONTENTS

NOVEMBER

Vol. 71, Nos. 1–2

Carolyn M. Klinge — 1 Role of estrogen receptor ligand and estrogen response element sequence on interaction with chicken ovalbumin upstream promoter transcription factor (COUP-TF)

Elizabeth L. Schubert, Ming K. Lee, Beth Newman and Mary-Claire King — 21 Single nucleotide polymorphisms (SNPs) in the estrogen receptor gene and breast cancer susceptibility

Hsueh-Kung Lin, Chien-Fu Hung, Margaret Moore and Trevor M. Penning — 29 Genomic structure of rat 3α-hydroxysteroid/dihydrodiol dehydrogenase (*3α-HSD/DD, AKR1C9*)

I. Cavarretta, V. Magnaghi, P. Ferraboschi, L. Martini and R. C. Melcangi — 41 Interactions between type 1 astrocytes and LHRH-secreting neurons (GT1-1 cells): modification of steroid metabolism and possible role of TGFβ1

Ikuko Toda, Benjamin D. Sullivan, L. Alexandra Wickham and David A. Sullivan — 49 Gender- and androgen-related influence on the expression of proto-oncogene and apoptotic factor mRNAS in lacrimal glands of autoimmune and non-autoimmune mice

D. Sunita Rao, Ramesh Dayal, Mei-Ling Siu-Caldera, Ronald L. Horst, Milan R. Uskokovic, Kou-Yi Tserng and G. Satyanarayana Reddy — 63 Isolation and identification of 4,25-dihydroxyvitamin D_2: a novel A-ring hydroxylated metabolite of vitamin D_2

Naïma Hida, Richard Poulin, Raymonde Veilleux and Fernand Labrie — 71 Differential androgen sensitivity is associated with clonal heterogeneity in steroid metabolism, ornithine decarboxylase regulation and IL-1α action in mouse mammary tumor cells

Teresa Koek — 83 Biotransformation XLVII: transformations of 5-ene steroids in *Fusarium culmorum* culture

91 Erratum

15 DECEMBER

Vol. 71, Nos. 3–4

Sara H. Windahl, Eckardt Treuter, Jacqueline Ford, Johanna Zilliacus, Jan-Åke Gustafsson and Iain J. McEwan — 93 The nuclear receptor-interacting protein (RIP) 140 binds to the human glucocorticoid receptor and modulates hormone-dependent transactivation

Osamu Nomura, Osamu Nakabayashi, Katsuhiko Nishimori, Hiroshi Yasue and Shigeki Mizuno — 103 Expression of five steroidogenic genes including aromatase gene at early developmental stages of chicken male and female embryos

M-L. Siu-Caldera, H. Sekimoto, S. Peleg, C. Nguyen, A-M. Kissmeyer, L. Binderup, A. Weiskopf, P. Vouros, M. R. Uskoković and G. S. Reddy — 111 Enhanced biological activity of 1α,25-dihydroxy-20-epi-vitamin D_3, the C-20 epimer of 1α,25-dihydroxyvitamin D_3, is in part due to its metabolism into stable intermediary metabolites with significant biological activity

Yue-ming Qian and Wen-Chao Song — 123 Correlation between PAP-dependent steroid binding activity and substrate specificity of mouse and human estrogen sulfotransferases

I. Šterzl, R. Hampl, J. Šterzl, J. Votruba and L. Stárka — 133 7β-OH-DHEA counteracts dexamethasone induced suppression of primary immune response in murine spleenocytes

Peter H. Jellinck, Constantine Pavlides, Randall R. Sakai and Bruce S. McEwen — 139 11β-Hydroxysteroid dehydrogenase functions reversibly as an oxidoreductase in the rat hippocampus in vivo

I. P. Nnane, V. C. O. Njar, Y. Liu, Q. Lu and A. M. H. Brodie — 145 Effects of novel 17-azolyl compounds on androgen synthesis in vitro and in vivo

James R. Berrie, Ralph A. D. Williams and Kelvin E. Smith 153 Microbial transformations of steroids-XI. Progesterone transformation by *Streptomyces roseochromogenes*–purification and characterisation of the 16α-hydroxylase system

31 DECEMBER

Vol. 71, Nos. 5–6

H. M. Jacobs, A. B. van Spriel, S. G. A. Koehorst, J. H. H. Thijssen, G. Blaauw and M. A. Blankenstein 167 The truncated estrogen receptor alpha variant lacking exon 5 is not involved in progesterone receptor expression in meningiomas

M. Numazawa, M. Nagaoka, M. Morio and T. Kamiyama 173 19-oxygenations of 3-deoxy androgens, potent competitive inhibitors of estrogen biosynthesis, with human placental aromatase

R. B. Lichtner, K. Parczyk, W. Birchmeier and M. R. Schneider 181 Differential cross-talk of estrogen and growth factor receptors in two human mammary tumor cell lines

C. K. Wong and W. M. Keung 191 Bovine adrenal 3β-hydroxysteroid dehydrogenase (E.C. 1.1.1.145)/5-ene-4-ene isomerase (E.C. 5.3.3.1): characterization and its inhibition by isoflavones

Bernhard Ugele and Sabine Simon 203 Uptake of dehydroepiandrosterone-3-sulfate by isolated trophoblasts from human term placenta, JEG-3, BeWo, Jar, BHK cells, and BHK cells transfected with human sterylsulfatase-cDNA

N. Kumar, A. Crozat, F. Li, J. F. Catterall, C. W. Bardin and K. Sundaram 213 7α-methyl-19-nortestosterone, a synthetic androgen with high potency: structure-activity comparisons with other androgens

G. Fiorelli, L. Picariello, V. Martineti, F. Tonelli and M. L. Brandi 223 Estrogen synthesis in human colon cancer epithelial cells

Oldřich Lapčík, Richard Hampl, Martin Hill and Luboslav Stárka 231 Immunoassay of 7-hydroxysteroids: 2. Radioimmunoassay of 7α-hydroxy-dehydroepiandrosterone

E. Degryse, G. Cauet, R. Spagnoli and T. Achstetter 239 Pregnenolone metabolized to 17α-hydroxyprogesterone in yeast: biochemical analysis of a metabolic pathway
